FDD Abstract of

25X1A

1951 SCRAP-IRON STOCKS OF SIX PLANTS (1 p; German; undated)

25X1A

 Comment: There is an acute scrap iron shortage in the GDR iron and steel industries. The pig iron production will, therefore, be especially expanded under the Five-Year Plan.

This document consists of a photostated list, prepared by the Main Department of the Iron Industry of the GDR Ministry of Metallurgy and Ore Mining, of the stocks of scrap iron (in tons) at the Maxhuetten, Brandenburg, Hennigsdorf, Riesa, Groeditz, and Doehlen steel plants.

Figures are given for stocks on hand on six different dates in 1951: 1 January, 30 March, 30 September, 24 October, 23 November, and 31 December. The total scrap-iron stocks for all six plants on these dates are also given. On 31 December 1951, total stocks of scrap iron amounted to 111,982 tons.
